

Student Accounts

Overview

CampusVue™ Student Accounts integrates critical workflows in an easy-to-use environment. Based on key activities defined by the school, the system automatically updates each student's ledger. For example, it tracks admissions deposits and course charges, then posts these charges automatically or after approval. It prints numbered receipts, reducing time and non-essential paperwork. Robust financial aid functions can track individual records by source and record cash or credit card payments. To issue a refund, Student Accounts automatically makes all the entries to the ledger.

CampusVue provides all the necessary detail at the journal level while accommodating an institution's preferences for third-party applications.

Benefits & Features

Enjoy Access to Transaction Processing

Maintain a detailed ledger card for each student. Post individual charges, payments, refunds, and adjustments. Create unlimited subsidiary accounts and separate their transactions.

Customize Payment Schedules for Students

Choose source, amount, and number of payments, even add interest if necessary, and create an individual payment schedule. Run the calculation, and see all scheduled payments including amounts, principle and interest, balance, and status. Additional summary information provides payments received, refunds and more details.

Determine Revenue

Generate revenue ledger information for deferred and earned income with Earnings Summary and Earnings Detail information.

Quickly Batch-Process Student Statements

Simply use the wizard included within CampusVue's Student Accounts application.

Easily Calculate Refunds

Set up policies easily in Student Accounts, run refund calculations and evaluate and display every applicable refund policy to select the most appropriate one. View the detailed calculations and print them for documentation. Post the refund once the calculation is final—the system automatically makes the appropriate ledger card entries, then schedules printing of a refund check. This feature supports all the standards of the Federal Refund Calculation, including the return of Title IV Funds.

Batch Functions Daily

Student Accounts provides many daily functions, such as Document Tracking, Post-Admissions Deposits, Registration Billing, Generating Interest Charges, Posting FA Disbursements, Charges, Payments, Individual Refunds, Stipend Disbursements, Transaction Search, Student Statements, Bank Deposits, Print Refund & Stipend Checks, Export 1098-Ts, Revenue Recognition, and Release to General Ledger.

Solution Overview

CampusVue is an extensive, easily supported administrative system from a leader in technology and services for higher education. Highly configurable and scalable, CampusVue is a complete solution recognized for its comprehensiveness and its abilities to support diverse multi-site and browser-based programs. Modules available with the CampusVue solution include:

- CampusPortal™ Web solution (optional)
- Admissions & Recruiting
- Academic Records
- CampusCRM™
- Career Services
- Enterprise Reporting
- Financial Aid
- Student Accounts
- CampusCornerstone™ Advancement (optional)
- CampusVantage™ Financials & HR (optional)
- Business Intelligence (optional)
- CampusLink APIs (optional)
- Housing Management (optional)
- Document Imaging (optional)

Campus Management has developed a network of premier partners, creating a turnkey approach to enterprise solutions that can help institutions quickly achieve their vision of a more technologically unified and operationally competitive campus.

Faster Time-To-Value

No matter how small or large your institution, staying competitive means optimizing new technology quickly. Ensuring that users find the technology as simple to use as it is powerful is equally important. Campus Management, a solutions innovator dedicated to post-secondary education, applies its in-depth knowledge to address critical issues such as integration, data conversion, user training and support.

Technology

The goal is to provide a stable, scalable, and easy to support solution for increasingly complex, multi-campus Higher Education enterprises. CampusVue uses n-tier client-server architecture. Distributed architecture with clustering ensures high availability, scalability, security features, and lower system maintenance costs.

The solution is based on Microsoft® .NET technology, utilizing SQL Server, COM+ and Visual Basic, typically deployed in a centralized environment on multiple application servers, database servers, and Web servers.

The CampusPortal™ system is based on C# and ASPX technology. Thin-client access provides secure, centralized deployment and extends capability to Macintosh® computers.

About Campus Management

Every day, more than 1,000 campuses and hundreds of thousands of students, faculty, administrators, and staff worldwide rely on Campus Management for complete and cost-effective administrative solutions. Rapid implementation, robust applications, and responsive support have defined Campus Management's leadership in higher education since 1988. For scalability, ease of use, and the lowest possible cost of ownership, CampusVue™ enterprise administrative software has become the cornerstone of excellence for a diversity of best-in-class institutions.
