

CampusVue Student Housing Management

CAMPUSSM
MANAGEMENT

“ The entire journey, the entire educational experience, you can use CampusVue to manage every step of the process. ”

Raymond Todd Blackwood
Director of Technology
University of Advancing Technology

CampusVue Student

CampusVue® Student is the leading student information system for today's institutions of higher learning. Administrators and faculty leverage centralized data and automated workflows to improve recruiting, retention, academic delivery, and student services, while business officers gain a 360° view of campus operations for strategic analysis. The integrated product suite is designed to streamline and speed administrative tasks and offers modules for recruiting and admissions, academic records, financial aid automation, student accounts, housing management, career services, and reporting.

Virtual Housing Management

CampusVue Housing Management enables online self-service and paperless administration of student housing for today's fast-paced environment. Housing directors and staff enjoy powerful facility configuration tools in a highly flexible framework that centralizes and streamlines workflows and even allows for future property acquisitions or repurposing of existing facilities. Students can go online to choose facilities and roommates as well as make payments. CampusVue Housing Management pulls data from CampusVue Student for one-stop consolidated reporting, tracking, automated billing, and notifications.

CampusVue Student Housing Management

Comprehensive Reporting and Analysis

Administrators can use built-in reports or customize as needed to instantly predict future vacancies, track student progress through the placement process, and aggregate data on population percentages and trends. They can also report on incidents and disciplinary actions.

Accessible Online Information

With the Housing Management module, you can deliver housing-related content and self-service functions, including online housing applications. Using a configurable form, you can assign weights to various preferences and priorities, and match roommates based on unique matching points.

Expansive Housing Decision-tools

Housing administrators have a logical, overall framework for the student matching process, as well as for providing students with greater selectivity of housing location, amenities, and their future roommates.

Integrated Billing Processes

With CampusVue Housing Management, you can automatically bill students at predefined or system-calculated intervals, batch charges at any time, and require approval from the student billing office before transactions are posted.

Customized Housing Application Tools

Create meaningful questions to facilitate the matching process. Assign required deposits and fees and allow students to pay online as they fill out their applications.

Automatically Generate Leases and Notifications to Students

Built-in tools allow staff to manage not only student lease histories, but also notification and welcome letters, signed documents, and any changes at the individual student level.

About Campus Management Corp.

More than 1700 colleges, universities, foundations, and nonprofit organizations worldwide rely on Campus Management Corp® for efficient, scalable, and flexible enterprise software products and services. The company's CampusVue Ecosystem is a fully integrated, centralized administrative and e-Learning platform that unifies services, academic delivery, administrative management, and reporting for a full range of public, private, and proprietary postsecondary institutions. The platform connects multiple sites and catalogs, enables flexible terms and multiple enrollments, and integrates economically to other leading applications, including software for Constituent Relationship Management (CRM), and learning management systems such as Blackboard® and Moodle®. Clients include Mercer University, Baker University, National University, Indiana University, and Kaplan University.

The CampusVue Ecosystem Unites Academics and Administration

- Student information system for integrating departments and workflows
- Moodle-based e-Learning for online and blended academic delivery
- Self-service Web portals for students, faculty, administrators, advisors, and employers
- Finance, HR & payroll for fund and net asset accounting and employee self-service
- Performance analytics for a 360° view of multi-campus operations
- CRM solutions for strategic enrollment management, e-advising, and alumni relations
- Fundraising solutions for advancement and foundation programs

Dynamic Web Portals for Higher Education

With CampusVue Portal, you bring the college experience online to a diverse constituency, virtualizing academics and administration across campus and beyond. Instead of manual, paper-intensive processes for admissions, academic records, housing, financial aid, and billing, tasks can be initiated and processed through dynamic Web portals linked to the CampusVue Ecosystem. The solution provides security-rich features in an easy-to-use, personalized format. Make CampusVue Portal the virtual gateway to your institution.

“ Campus Management’s CampusVue product is the premier product for higher education. They are geared solely towards higher education. Some of the other vendors we were looking at didn’t have that sole focus.”

Jason Best
Director of Media & IT
Mars Hill Graduate School
