

CampusVue Student Student Accounts

CAMPUSSM
MANAGEMENT

“ CampusVue is everything to our schools. It’s the entire lifecycle of the student...the most critical system we have. ”

Margaret Matthei
Vice President of Business Operations
Career Education Corporation

CampusVue Student

CampusVue® Student is the leading student information system for today’s institutions of higher learning. Administrators and faculty leverage centralized data and automated workflows to improve recruiting, retention, academic delivery, and student services, while business officers gain a 360° view of campus operations for strategic analysis. The integrated product suite is designed to streamline and speed administrative tasks and offers modules for recruiting and admissions, academic records, financial aid automation, student accounts, housing management, career services, and reporting.

Automate, Integrate, and Streamline Student Accounts

The Student Accounts module is built into CampusVue Student to streamline and automate student billing and other critical workflows. Based on key activities defined by your institution, the module automatically updates each student’s ledger. For example, the module tracks admissions deposits and course charges, then posts these charges automatically or after approval. It also provides robust financial aid functions to track individual records by source and record cash or credit card payments. The module can also perform batch functions daily for document tracking, registration billing, FA disbursements, bank deposits, and generating interest charges.

Student Accounts

Create Dynamic Workflows with Student Accounts

Easily integrated with your current accounting system or other third-party application, the Student Accounts module provides robust management of student ledgers and related workflows, including:

- Document tracking
- Post-admissions deposits
- Managing charges and payments
- Generating interest charges
- Posting FA disbursements
- Making bank deposits
- Processing 1098-Ts
- Revenue recognition
- Releasing to general ledger
- Generating refund and stipend checks
- Printing numbered receipts
- Tracking monies received and paid out by utilizing cash drawers functionality
- Applying discounts to tuition rates

Automate Transaction Processing

The Student Accounts module enables institutions to maintain a detailed ledger card for each student, create subsidiary accounts, and record individual charges, payments, refunds, and adjustments. Unlimited subsidiary accounts can also be created to separate their transactions.

Determine Revenue

Institutions can generate revenue ledger information for deferred and earned income with the Earnings Summary and Earnings Detail tools.

Easily Calculate Refunds

With Student Accounts, you can set up policies, run refund calculations, and evaluate and display every applicable refund policy to select the most appropriate one. You can also view the detailed calculations and print them for documentation. The system automatically makes the appropriate ledger card entries, then schedules the printing of refund checks. This feature supports all the standards of the Federal Refund Calculation, including the return of Title IV Funds.

Customize Student Payment Schedules

CampusVue Student Accounts enables staff to create individual payment schedules based on payment type, amount, number of payments, and interest, as well as run payment schedules and summaries.

The CampusVue Ecosystem Unites Academics and Administration

- Student information system for integrating departments and workflows
- Moodle-based e-Learning for online and blended academic delivery
- Self-service Web portals for students, faculty, administrators, advisors, and employers
- Finance, HR & payroll for fund and net asset accounting and employee self-service
- Performance analytics for a 360° view of multi-campus operations
- CRM solutions for strategic enrollment management, e-advising, and alumni relations
- Fundraising solutions for advancement and foundation programs

About Campus Management Corp.

More than 1700 colleges, universities, foundations, and nonprofit organizations worldwide rely on Campus Management Corp® for efficient, scalable, and flexible enterprise software products and services. The company's CampusVue Ecosystem is a fully integrated, centralized administrative and e-Learning platform that unifies services, academic delivery, administrative management, and reporting for a full range of public, private, and proprietary postsecondary institutions. The platform connects multiple sites and catalogs, enables flexible terms and multiple enrollments, and integrates economically to other leading applications, including software for Constituent Relationship Management (CRM), and learning management systems such as Blackboard® and Moodle®. Clients include Mercer University, Baker University, National University, Indiana University, and Kaplan University.
